GENERAL INFORMATION

AcidiGrow® 3-13-3 solution is a low pH, low salt index, clear liquid solution. The low pH is designed to provide good performance in fertigation applications. All phosphate is in the ortho-phosphate form for compatibility with hard water sources. AcidiGrow® 3-13-3 contains fully EDTA chelated Iron, Manganese and Zinc to prevent micronutrient tie-up in the soil. Recommended for use on, but not limited to, vegetable and row crops, deciduous fruit and nut trees, citrus, avocados, vine and berry crops.

DIRECTIONS FOR USE

Inject AcidiGrow® 3-13-3 solution into the irrigation lines after filters. Thoroughly clean irrigation lines and system after injection of AcidiGrow® 3-13-3 solution by flushing irrigation lines and system with clean water prior to turning off pumps. AcidiGrow® 3-13-3 solution may be applied to a wide variety of agricultural crops. Potassium requirements for most crops increase dramatically during periods of rapid growth and fruit development. All rates should vary based on the severity of soil and plant tissue deficiency and degree of weather extremes.

SOIL APPLICATION RATES

AcidiGrow® 3-13-3 solution may be applied pre-plant, as a starter, side dress, fertigated, top dressed or banded to the soil. Dilute with water if needed to ensure uniform distribution.

Trees and Vines: Apply 2-15 gallons per acre based on soil levels and crop requirements. Repeat applications as soil or tissue testing indicates or based on good agronomic practices.

Vegetable and Row Crops: Apply 2-15 gallons per acre based on soil levels and crop requirements.

FERTIGATION APPLICATION RATES

Flood and Furrow Application (Trees and Vines): Apply 2-15 gallons per acre per application beginning at full leaf, schedule as needed. Repeat applications as soil or tissue testing indicates or based on good agronomic practices.

Vegetables and Row Crops: Apply 2-15 gallons per acre per application, schedule second application based on crop requirements. Repeat applications as soil or tissue testing indicates or based on good agronomic practices.

SPRINKLER AND DRIP IRRIGATION RATES

Trees and Vines: Apply 2-15 gallons per acre every 10 to 14 days based on crop requirements, or as tissue testing indicates. Inject after irrigation filter. After fertilizer injection, allow enough irrigation time to flush the lines thoroughly of any residual fertilizer

Vegetables and Row Crops: Apply 2-15 gallons per acre per application based on crop requirements. Repeat applications as soil or tissue testing indicates or based on good agronomic practices.

Use in accordance with recommendations of qualified individual or institution such as, but not limited to, a certain crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan. When tank mixing other products, "Jar Test" proportionally mixed components to confirm compatibility.

WARNING: This product may contain chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

CONDITIONS OF SALE AND WARRANTY

Mar Vista Resources (Seller) warrants that the chemical composition of this product conforms to the chemical description given on this label. THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES AND REPRESENTATIONS EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR USE. No one is authorized to make any other warranty, guarantee or directions concerning this product, and no such warranties, guarantees or directions shall be valid or binding upon Seller. Timing, rate and method of application, weather and crop conditions, mixtures with chemicals not specifically recommended on this label or an accompanying written recommendation, are beyond the control of Seller. Buyer assumes all risks of use, storage and handling of this material not in strict accordance with directions given herewith. In no case shall Seller be liable for consequential, special, indirect, or incidental damages or losses resulting from the handling or use of this product. The foregoing is a condition of sale by Seller and is accepted as such by the buyer. Buyer further agrees in the event of damages arising from the use of this product to accept a replacement of the product or a refund of the purchase price of the product, at buyer's option, as full discharge of Seller's liability.
