### DIRECTIONS FOR USE

FoliMar® K-Drive Elite is a clear Potassium Acetate solution. Potassium Acetate is readily available and is quickly absorbed by the leaf and root. FoliMar® K-Drive Elite may be blended with other fertilizers and is intended to be applied as a foliar based treatment on selected crops.

**NOTE:** When used as directed this product does not supply all nutrients required by plants and is to supplement a soil fertility program.

Use in accordance with recommendations of qualified individual or institution such as, but not limited to, a certain crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan. When tank mixing other products, "Jar Test" proportionally mixed components to confirm compatibility. When blending with other products, trial blends should be conducted before beginning large scale mixing. When blending with other pesticides and fertilizers, the sequence should be: water, pesticide, fertilizer, micro-nutrients.

### APPLICATION RATES

Repeat application every 2-4 weeks as needed. For best results apply early in the morning or late afternoon. Do Not spray in the heat of the day or while the crop is under stress. Do Not spray to the point of runoff. Do Not exceed a 2.5% solution of FoliMar® K-Drive Elite in spray mix.

Crop	Foliar Applied Rate
Tree Crops	2.0 to 12.0 qts/acre
Small Fruit and Vine Crops	1.0 to 8.0 qts/acre
Vegetable Crops	1.0 to 6.0 qts/acre
